The Language Centre

In times of internationalisation and globalisation, the ability to communicate with people from other cultures is one of the most important conditions for international co-operation, and the Language Centre has a special role to play in this. Like no other branch of the university, the Language Centre is in a position to respond to the potential of multilingualism and make it fruitful for students.

The Language Centre is a central service provider of the university. As such, it is responsible for the provision of language courses for all students and employees of the university. The Language Centre considers itself to be a mediator of foreign language skills and competences as well as knowledge of cultures and their differences. Accordingly, it makes available linguistic and cultural tools for successful mobility, increases the competitiveness of students, and facilitates their entry into professional life.

Welcome to the Otto-von-Guericke Graduate Academy!

The Graduate Academy is the central service unit for all doctoral students and postdocs at the Otto von Guericke University Magdeburg. We are providing useful programmes and support in all matters beyond the regular course of study. By expanding and linking the various services at OVGU, we will help ensure the best conditions for the successful completion of your doctorate in Magdeburg. We also support your career inside and outside academia after the doctorate.

Mentoring Program COMETiN

COMETiN will start a new series from October 2024.

The program COMETiN is aimed at women and individuals who identify as female, who wish to actively shape their professional future and aspire to leadership roles in science, industry, or research.

The one-year program offers early-career female scientists the opportunity to engage continuously and sustainably in planning and implementing their career steps through various workshops, coaching sessions, and mentoring. It also aims to expand academic key qualifications and foster supportive relationships with other scientists.

The program supports the individual career development of female scientists starting from the doctoral phase, through the post-doc phase, and as junior professors. The program is bilingual (German and English) - international are warmly welcome and encouraged to apply! Wildcards (for staff members and non-OVGU affiliates, e.g., IFF, MPI, H2, etc.) are possible.

COMETiN consists of four modules, conducted within a steady cohort of companions over the course of one year, each approximately once a month:

- COACHING
- MENTORING
- TRAINING
- NETWORKING (e.g., alumni events)
Peer Mentoring: DocAGs

We would like to support self-organization and self-dependence of doctoral candidates and postdocs, to build "peer-mentoring"-groups. You may build a group of minimum 5 doctoral candidates and/or postdocs from at least 2 different working groups as a 'DocAC' and you will then have the opportunity of applying for funding for self-organized workshops and for inviting visiting scholars.

The goals of these groups may be to discuss the projects of the participants on a regular base and to support each other this way. Probably it might also be helpful to focus on the writing itself, to avoid effects of writer's blocks or procrastination.

Application for the registration of a DocAG in the frame of the Graduate Academy

DocAGs may apply for a small budget of up to EUR 500,- per year, to invite speakers or to organize a workshop or retreat. The maximum sum of 500,- EUR may be splitted to more than one application. Funding is only possible for DocAGs with doctoral candidates and postdocs of at least two working groups. For higher-cost activities, this budget can also be used as pro-rata funding. In principle, there is no funding of travel costs to meetings of the working group in Magdeburg.

Please send us the application form at least 4 weeks before the event you are planning.

If you have any question, please refer to barbara.witter@ovgu.de.

Examples of successful DocAG activities that have been supported in the past:

- Retreats by DocAGs outside of Magdeburg as writing workshops
- Participation in networking events with doctoral students from other universities in Germany and abroad
- Invitations of speakers to give a lecture in Magdeburg
- Coaching of the peer mentoring group

Conflict Moderation

Respect and mutual appreciation are important prerequisites for a good basis for cooperation, also and especially in science. However, when people work together intensively, conflicts can also arise that damage or undermine this basis. If problems ever arise, you as a member of OVGU can access various support services.

Depending on the exact causes and circumstances of a conflict, you can find support at various contact points. Basically, if the problems are serious enough for you to want support, do not hesitate to contact us. A conflict will usually be more difficult to resolve if it has escalated more. All contact persons will treat your concerns as strictly confidential and will only take further action, if necessary, in consultation with you.

Stages of conflict resolution

Stage 1:
Attempt to clarify within the working group, involving the institute director or dean if necessary.

Stage 2:
Support from the Graduate Academy for a low threshold conflict moderation: Contact

Stage 3:
involve internal contacts or stakeholders:
- Ombudsman for dealing with scientific misconduct; Prof. Dr. Christian Apfelbacher
  - Guidelines of OVGU on dealing with scientific misconduct
- Ethics Commission of OVGU (Medical Faculty)
- Conflict Officer of OVGU
  - OVGU staff agreements on conflict prevention
- Representative for Foreigners’ Affairs: Conflicts with an intercultural aspect
- Gender Equality Officer
- Psychosocial Counselling
- Family Officer
- Support for handicapped persons
- Contact points Sexual Discrimination
